Not ready to do the full disc brake conversion? All parts are available separate to fit any budget.

Inline Tube carries disc brake conversion kits. Our conversion line sets bolt on the factory locations, taking the work out of bending your own lines. All you have to do is install.

Inline Tube Exclusive Ready to bolt on rear drum brakes for your concours restoration.

Brake Straight Line Set 30'

We carry everything you need to do it yourself

A preformed set may not work for your particular application. When building a street rod, there is no way to standardize the parts and locations to provide preformed lines. For the street rod builder we provide everything from the tubing, fittings, proportional valves, residual valves, hoses, clamps and the tools to get the job done right.

Straight Length Sets

We offer straight length sets that include all the material to complete the brake plumbing on any car or truck. Sets come with tubing, fittings, spring wrap, unions and tees.

Steel Set **\$60** Stainless Set **\$125**

If you are upgrading to disc brakes, we have the valve you need. We carry valves for all disc/drum or disc/disc applications for both cars and trucks.

All Inline tubes are manufactured in a 14,000 sq ft state-of-the-art facility, located in the Motor City.

Inline Tube does a ton of homework to research the parts we make. Every part we make is verified off an original car.

Inline Tube carries hundreds of hoses and now we have made all the frame brackets for the popular cars.

All Inline tubes fit and look exactly like the originals. Whether you are doing a frame-off or necessary maintenance, we can help get the job done.

All Lines come completely preformed with the correct fittings on the ends and spring wrap.
